

Environment: TSTING
Test Level: Integration

Script # / Name: 2.3 - FP DataMart Interface Impact
 This script will test the impact of the enhancements made to Form 2000 on the DataMart
Scenario Description: Database.

File Name:

Scripts 2.1 and 2.2 have been run. User is aware of the number of times Annual, Monthly and

Assumptions: Monthly/Quarterly reports have been run.

Executed By / Date:
Product / Release: TO 149 - Form 2000 Enhancements Release II
Prepared By / Date: Nick Villamizar / 7 January 2004
Acceptance Sign Off / Date:

Pass/Fail	
------------------	--

Step	Action	Navigation Path	Input	Expected Results	Actual Results	Req #	Pass / Fail	Issues/Comments
1	Query the Monthly table. Note the number of lines. Save query results and print out a copy.		SELECT * FROM FFELGA.FFELGA_MONTHLY_R EPORTS	For every Monthly form submitted, a line exists in the table (ie: the count matches the number of forms submitted.) Fields MR-24, MR-25, MR-26 appear at the bottom of the form as expected.				
2	Query the Annual table. Note the number of lines. Save query results and print out a copy.		SELECT * FROM FFELGA.FFELGA_ANNUAL_REP ORTS	For every Annual form submitted, a line exists in the table (ie: the count matches the number of forms submitted.)				
3	Query the Monthly/Quarterly table. Note the number of lines. Save query results and print out a copy.		SELECT * FROM FFELGA.FFELGA_MONQUART_ REPORTS	For every Monthly/Quarterly form submitted, a line exists in the table (ie: the count matches the number of forms submitted.)				
4	Log on to Oracle Applications (TSTING) and navigate to FSA FP DataMart Manager Responsibility .							
5	Navigate to the 'Submit New Requests' Window.	Others --> Requests --> Run --> Single request -->OK						
6	Kick off the 'FSA FMS FPDatamart Data Transfer Program'. Keep default values for parameters.		FSA FMS FPDatamart Data Transfer Program					
7	Ask DataMart to query their respective tables to ensure that all data from the Monthly forms were successfully loaded into their table. Ask them to pay special attention to the additional columns making sure that no data was left out. Give them copies of query results from Step 1.			The contents of the FFELGA_MONTHLY_REPORTS table were copied successfully into the DataMart SR_FFELGA_MONTHLY_REPORTS table and SR_FFELGA_MONTHLY_REPORTS_PRV table. The additional fields MR-24_P, MR-24_I, MR-24_O, MR-25_P, MR-25_I, MR-25_O, MR-26_I, and MR-24_O were passed without error. Data is populated as expected with values for MR-24, MR-25, and MR-26 for all records, with the exception of quarterly records that do not have a corresponding monthly record in the table.				
8	Ask DataMart to verify that the Forms 2000 Annual and Monthly/Quarterly forms were not affected by the additional fields added to the monthly table. Give them copies of query results from steps 2 and 3.			All contents of the FFELGA_ANNUAL_REPORTS and the FFELGA_MONQUART_REPORTS were successfully copied. This process was not affected by the addition of the new fields in the FFELGA_MONTHLY_REPORTS. FFELGA_MONQUART_REPORTS table still contains fields MR24, MR25, MR26, but any new records that were created during testing will not contain data.				

9	For additional verification, log onto the DataMart DB and and query the SR_FFELGA_MONTHLY_REPORTS table to ensure all contents transferred successfully. Use the query results from Step 1 to compare.		SELECT * FROM SR.SR_FFELGA_MONTHLY_REP ORTS@FPMPRODLINK	The contents of the FFELGA_MONTHLY_REPORTS table were copied succesfully into the DataMart SR_ FFELGA_MONTHLY_REPORTS table. The additional columns MR-24_P, MR-24_I, MR-24_O, MR-25_P, MR-25_I, MR- 25_O, MR-26_I, and MR-24_O were passed without error.				
10	For additional verification, log onto the DataMart DB and and query the SR_FFELGA_ANNUAL_REPORTS table and SR_FFELGA_MONQUART_REPORTS table to ensure all contents transferred successfully. Use the query results from Steps 2 and 3 to compare.		SELECT * FROM SR.SR_FFELGA_MONQUART_R EPORTS@FPMPRODLINK	All contents of the FFELGA_ANNUAL_REPORTS and the FFELGA_MONQUART_REPORTS were successfully copied. This process was not affected by the addition of the new fields in the FFELGA_MONTHLY_REPORTS.
